### FACTS

Lodi Memorial Hospital is a non-profit, acute-care hospital, owned by the Lodi Memorial Hospital Association. Association membership is open to anyone for a one-time, lifetime fee of \$100. Members participate in the annual election of board members who direct the hospital. For 58 years the hospital's mission has been to provide quality medical care, education and support services to the community; and to improve community members' quality of life. LMH is licensed for 270 acute-care beds. Two LMH campuses and several satellite clinics are used to provide a variety of inpatient and outpatient services. LMH employs 1,300 individuals, about one-third of which are nurses. There are 132 physicians on the active medical staff.

#### **Hospital services**

Services include emergency, maternity, nursery, pediatric, intensive, acute-physical rehabilitation, transitional, surgical and medical care. Home-health care and durable-medical equipment are also available. LMH operates several hospital-based clinics: urgent-care, three primary-care clinics, a pre-natal clinic, a pediatric clinic, a pulmonary-medicine clinic, an occupational-medicine clinic and a free clinic for the uninsured. Three community clinics offer care in Lodi, as does one in North Stockton. A Lodi endoscopy center and an outpatient-surgery center North Stockton are among LMH's affiliated businesses.

#### **Clinical-support services**

These services include a clinical laboratory, cardiac-catheterization laboratory, ultrasound, CT scan, nuclear medicine, x-rays, respiratory, pharmacy, and dietary services.

#### **Treatment programs**

Physical, occupational, speech and cardiac rehabilitation are among outpatient-treatment programs. The hospital also operates a wound-treatment clinic.

#### **Community services**

Adult-day care, pre-school care, a community-fitness center, free physician referral, parish-nurse programs and a free clinic for the uninsured are among the hospital's community services. Lodi Memorial Hospital also provides free health screenings at a variety of public events throughout the year and offers speakers to community groups upon request. Lodi Regional Health Systems, Inc., which includes a medical-services organization, is a for-profit subsidiary.

#### **Education**

Programs include maternal/child classes for mothers, fathers and siblings and diabetes education for diabetics, their family members and professional staff. Continued education for RNs, LVNs, CNAs, home-health aides, physicians, medical technologists and other professionals. Forums are offered to community members on wellness, injury prevention and treatment. Medical and health-education libraries are open to staff and community members alike.
