

YOUR SAFETY IS NUMBER ONE

Cecil Dillon, LMH Board Chair, emphasizes safe-patient identification as a top priority

PROMOTING PATIENT SAFETY

As part of our ongoing effort to provide our patients with the very best in care, improved patient-identification safety is a goal of the LMH Board of Directors.

For starters, when admitted for services, patients will be asked to present photo identification. Then once patients receive ID bands, they'll be asked by the nursing, pharmacy and all other LMH staff to verify the information on the ID bands.

“Positively identifying patients is our key effort for maintaining patient safety,” says Cecil Dillon, LMH Board Chair. “The band identifies who you are, and that helps ensure that patients receive the correct care and medications for their individual medical needs.”

PREPARE TO BE SAFE GO

For patients, part of being safe is knowing what questions to ask. You can find helpful tips on our website, www.lodihealth.org
